---

PROFESSIONAL SUMMARY

Final-year Bachelor of Business and Information Technology (BBIT) student and Google Data Analytics Professional Certificate holder with hands-on experience in data cleaning, SQL querying, statistical analysis, and report building. Skilled at turning operational and transactional data into clear reports and insights that support decisions, with a business-systems background that helps connect numbers to how an organization actually runs. Detail-oriented, analytical, and quick to learn new tools, seeking an internship, attachment, or entry-level opportunity in business intelligence and data analytics where accurate data and timely reporting drive operational performance.

CORE SKILLS

- Data Analysis: Data collection, cleaning & validation, exploratory analysis, statistical methods (frequency distributions, central tendency, correlation, regression, hypothesis testing), trend and pattern identification
- Business Intelligence & Reporting: Excel (pivot tables, formulas, summaries), data visualization, KPI and performance reporting, daily/periodic report preparation, translating findings for non-technical audiences
- Databases & SQL: MySQL, SQL queries, relational database design, normalization, data integrity, record and stock-style tracking structures
- Business & Process Analysis: Requirements gathering, business process analysis, process documentation, systems analysis & design, identifying discrepancies and process gaps
- Technical: JavaScript, Node.js, React, REST APIs, Git/GitHub; Microsoft Word, Excel, PowerPoint
- Professional Competencies: Critical thinking, attention to detail, accuracy under deadlines, communication, teamwork, fast learning

ACADEMIC & TECHNICAL PROJECTS

SmartSave — Financial Management System for Chamas & SACCOs (Final Year Project)

- Designed and managed a MySQL relational database tracking member records, contributions, loans, repayments, and transactions, with structured reporting and financial reporting workflows
- Built data validation checks to catch entry errors and keep records accurate and reliable
- Integrated AI-based features for loan eligibility assessment, fraud detection, and financial health analysis, turning transaction patterns into decision-ready outputs
- Delivered the system end to end, from requirements gathering through testing and cloud deployment, using Git/GitHub for version control

Data Analysis & Database Projects (Academic Projects)

- Applied statistical methods (correlation, regression, hypothesis testing) to interpret business datasets and support decision-making
- Cleaned and validated datasets to prepare them for accurate analysis, and designed relational databases from business requirements using normalization, keys, and SQL

CERTIFICATIONS

- Google Data Analytics Professional Certificate — Google Skills
- Google Digital Marketing & E-commerce Certificate — Google Skills

EDUCATION

Bachelor of Business and Information Technology — In Progress, Expected Graduation: 2027
Kiriri Women's University of Science and Technology

Certificate in Full Stack Software Development — 2023
Emobilis Technology Training Institute

Kenya Certificate of Secondary Education (KCSE) — Ruchu Girls High School

ADDITIONAL INFORMATION

- Languages: English and Swahili (fluent)
- Availability: Immediate; open to internship, attachment, and entry-level opportunities
